# Executive Summary

## Results

**H1 YoY: Sales +11.5%**

**Operating Profit -1.5% / Ordinary Profit +9.4% / Net Income  
Attributable to Owners of the Parent +18.6%**

## Business

**GMO Trust Login, GMO Sign and CloudCREW byGMO  
continued to deliver strong growth**

## Strategy

**Execute the AI-driven circular growth model amid rising AI  
demand**

**Conduct a disciplined review of the business portfolio**

# **Business Portfolio & AI Strategy**

## Business Portfolio | Capital Allocation Discipline

**Regularly review the business portfolio, reallocate capital to higher-growth areas, and rotate businesses**

[Divestiture] GMO Digital Lab Co., Ltd.

Although the business has growth potential as an AI-native sales-promotion service, we determined it was non-core to our strategic portfolio and divested our entire shareholding.

[Investment] GMO AI Connect Co., Ltd.

Invest in a secure AI-data integration platform within our “Designing Trust” domain.  
Results will be consolidated from Q3 FY2026.

**Improve both capital efficiency and business growth through disciplined selection and focus**

# Synergies from GMO AI Connect Joining Our Group

**Accelerate safe enterprise AI adoption and drive cross-selling, recurring revenue and corporate value**

## Enhance Existing Services

Evolve into AI-agent-ready services

## Expand Customer Value

Enable secure workflow automation and cross-system integration

## Enter Growth Markets

Create new revenue opportunities in AI agent / MCP markets

## Create Trust with Authentication × AI

Build trust infrastructure through “Trust” × “AI & Data Integration”

# SaaS Becomes AI-Agent-Ready, Deepening Usage and Opening New Channels

## GMO Trust Login and GMO Sign add MCP support, becoming SaaS services that can be used directly by AI agents

**GMO Trust Login** (launched Apr. 2026; first among Japan-based IDaaS providers)

AI gains cross-service visibility of IDs and SaaS usage, automating offboarding access control and access reviews. Offered on higher-tier plans, it also creates upsell opportunities.

**GMO Sign** (MCP server planned for fall 2026)

AI agents will be able to execute contract workflows directly through MCP. This gives GMO Sign a new entry point into the rapidly growing AI agent market (\$7.9bn in 2025 → \$294.7bn in 2035; Precedence Research) and broadens touchpoints with new customers.

**Direct AI-SaaS connectivity creates new value.  
Deepen usage by existing customers while  
acquiring new customers.**

# Three Ways GMO Sign MCP & AI Integration Creates Value

1

Contracts Become  
AI-Ready Assets

2

AI Agents Automate  
Contract Workflows

3

Contract Data Connects  
with Business SaaS

# About GMO AI Connect

## Turn AI into practical capabilities across the enterprise

### Connect AI and SaaS

**JOINT *Ai* Flow**  
by **GMO**

**Build AI-data integration environments without code**

**Build  
AI Agents**

**Connect to  
Existing  
Systems &  
SaaS**

For SaaS Providers

**Embed AI into  
Services  
for Customers**

**120+ SaaS connectors, with no-code MCP integration**

Money Forward Cloud / freee / box / Collaboflow /  
SmarHR / Microsoft Teams / Google, etc.

### Improve Work Efficiency with SaaS

ORACLE  
**NetSuite**  
Alliance Partner

Centered on cloud ERP Oracle NetSuite, we provide end-to-end SaaS implementation support—from requirements definition and go-live through customization and maintenance.

**Consultant  
Support**

**From

- Operating Margin

# Digital Certificate Business | Q2 Supplement

## Sales

- Q1/Q2 trend: Q1 saw pull-forward demand ahead of shorter certificate validity periods. As a result, Q2 sales were lower than Q1.
- Revenue Timing Shift: Certain overseas customers switched from purchasing 12-month certificates in Q2 to purchasing six-month certificates in Q2 and Q4. Because revenue is recognized at the time of purchase, a portion of revenue shifted from Q2 to Q4, with no impact on full-year revenue.

## Costs

- System development investment for cost reduction and new services, including certificate lifecycle management, was concentrated in Q2, temporarily increasing expenses.
- Investment concentrated in Q2 is largely complete; costs are expected to return to normal levels from Q3.

**Price increases for selected services and new enterprise customer wins remain on track; full-year forecast unchanged.**

# Status of Focus Products

## Digital Certificate Business, SSL, Client Authentication

# Certificate Lifecycle Management Strategy

## Background

International industry bodies have decided to shorten the maximum validity period of SSL/TLS server certificates to 47 days by 2029.

→ Certificate renewal workload will increase by approx. 10-fold.

## Keep critical infrastructure running with end-to-end certificate lifecycle management

Provide certificate lifecycle management in three formats based on customer needs (Windows software / SaaS / certificate visibility & management service)

Offer subscription licenses allowing unlimited certificate issuance during the contract term

| Period                | Maximum Certificate Validity |
|-----------------------|------------------------------|
| Through Mar. 14, 2026 | 398 days                     |
| From Mar. 15, 2026    | 200 days                     |
| From Mar. 15, 2027    | 100 days                     |
| From Mar. 15, 2029    | 47 days                      |

# GMO Face Authentication eKYC Supports IC Chip-Based Identity Verification

## Conventional ID Image Capture

1 Capture ID document with smartphone

2 Take a selfie with smartphone

3 Match the two face images

## New IC Chip Reading

1 Read the ID document's IC chip via app

2 Take a selfie via the app

3 Match the two face images

# DSS byGMO Integrates with TechSign

- Expand indirect sales channels by embedding DSS byGMO into partner SaaS “TechSign”
- Launched at an annual scale of approx. 150,000 documents, creating potential for growth in usage-based API revenue
- Track record of meeting stringent accreditation requirements such as ISO/IEC 17025 supports expansion into regulated industries

## Login Authentication Service

# GMOトラスト・ログイン

## GMO Trust Login

# Expanding Security Across the Supply Chain and Group

## Topic 1

### Supply Chain ID Protect Plan (launched Apr. 2026)

Manage IDs for external users—including business partners, franchisees and sales agents—without custom development. Address rising demand for supply-chain-wide security as the SCS Evaluation System takes shape.

## Topic 2

### Inter-Organization Linking (launched Aug. 2026; first among Japan-based IDaaS providers)

Extend parent-company authentication settings directly to subsidiaries, eliminating the weakest link across the group while reducing SaaS costs.

Expanding protection from the company itself to partners and group companies increases contract scope. Broader ID management coverage drives growth in customers and paid IDs.

## KPI Trends for GMO Trust Login

- Strong growth continues, supported by steady customer acquisition among large enterprises.

## Selected Customers

## Electronic Contract Service

電子印鑑なら  
**GMOサイン**

GMO Sign

# Automation Enabled by Sign MCP

Turn past contract documents into assets.

AI agents draft new documents based on past contracts and automate contract workflows.

# Connecting Business Data and Contract Data for AI-Powered eSignatures

**Automating End-to-End Back-Office Workflows with eSignatures as the Hub**

# Expanding Local Government Adoption and Strengthening Our Public-Sector Presence

**Approx. 40% of local governments that have adopted e-contracts use GMO Sign. Adoption is expanding from contract workflows to signatures by governors and mayors, positioning GMO Sign as public-sector infrastructure.**

## **1 Ibaraki Prefecture / Fukui Prefecture (Digitalization of ordinance promulgation)**

Ordinances are promulgated using electronic signatures with digital certificates specifying the governor's official role. Ibaraki Prefecture, which advocated for the relevant legal amendment, has also established a BCP framework enabling rapid promulgation during disasters.

## **2 Miyakonojo City (Digitalization of administrative disposition notices)**

The entire process from application to receipt of the disposition notice is completed online.

## **3 Ota Ward, Tokyo (First hybrid signature model among Tokyo's 23 wards)**

Strict party-type signatures for the local government and simpler witness-type signatures for businesses balance governance and usability.

## **4 Kariya City and others (Integration with FAST financial accounting)**

Contract award information is transferred automatically, improving the efficiency of local-government contract operations.

# Quarterly Sales and ARR Trends

# Vision 2040: To Be the Trusted Infrastructure Provider

**Next 2040**

## Designing trust. Connecting the world.

We envision a world where the internet is built on trusted information and true transparency.

By turning invisible trust into reliable, well-designed technology, we create systems anyone can use with confidence.

To build a trustworthy infrastructure for everyone, we aim to become the global leader in digital trust and authentication.

We Change Experience with IT

# "Invisible Defenders: How Certification Authorities Keep the Internet Safe"

Certification authorities are indispensable organizations for ensuring the security of electronic transactions and communications.

Our strength lies in being the only domestically developed certification authority, "GlobalSign," among the top four global companies with significant international market share.

We provide clear and accessible explanations of digital certification authorities, which support a safer and more secure internet environment that is close to our daily lives.

Moving forward, we will continue to strive to realize an even safer and more reliable digital society.

As a trusted cybersecurity brand chosen by customers, we are committed to further improving our services to deliver greater peace of mind and security.
